 Jack Mance, AICP

Director, Planning Committee Chair  
 Senior Transportation Planner

**Resolution 25-05 of the Adirondack / Glens Falls Transportation Council, approving the 2025-2030 Transportation Improvement Program, 2025 Self-Certification, and Albany-Schenectady-Troy 1997 8-Hour Ozone Non-Attainment Area Transportation / Air Quality Conformity Determination**

**Whereas**, the Adirondack / Glens Falls Transportation Council has been designated by the Governor of the State of New York as the Metropolitan Planning Organization (MPO) responsible for the comprehensive, continuing, and cooperative transportation planning process for the planning and programming area that includes Warren County, Washington County, and the Town of Moreau in Saratoga County; and

**Whereas**, Title 23 CFR Part 450 and Title 49 CFR Part 613 require that a Transportation Improvement Program (TIP) be developed and adopted by the Metropolitan Planning Organization; and

**Whereas**, the Planning and Programming area of the Adirondack / Glens Falls Transportation Council includes the entirety of Warren and Washington Counties and the Town of Moreau in northern Saratoga County; and

**Whereas**, the Planning Committee to the Council developed a draft 2025-2030 TIP update through the continuous, comprehensive and cooperative transportation planning process in coordination with state, regional and local officials; and

**Whereas**, the A/GFTC Planning Committee has reviewed and approved the draft 2025-2030 Transportation Improvement Program, 2025 Self-Certification and the Albany-Schenectady-Troy 1997 8-Hour Ozone Non-Attainment Area Transportation / Air Quality Conformity Determination for the required public comment and review period prior to final A/GFTC approval; and

**Whereas**, the availability of the draft TIP has been advertised and posted online for a period of twenty-five days or more as of May 8, 2025; and

**Whereas**, the A/GFTC Policy Committee, at its June 11, 2025, voted to approve as final the 2025-2030 Transportation Improvement Program, 2025 Self-Certification and the Albany-Schenectady-Troy 1997 8-Hour Ozone Non-Attainment Area Transportation / Air Quality Conformity Determination for the required public comment and review period prior to final A/GFTC approval; and

**Whereas**, the Council understands that only the first four years of project obligations that are contained within this five-year Transportation Improvement Program are to be submitted to the New York State Department of Transportation for inclusion in the Statewide Transportation Improvement Program (STIP) without modification; and

**Whereas**, although the 2025-2030 TIP satisfies the requirements for fiscal constraint, the Council recognizes that the contents of this TIP represent only a portion of regional transportation system needs, a great deal of which remain unfunded or unprogrammed due to those constrained resources; and

**Whereas**, this document contains a listing of illustrative projects that carry A/GFTC endorsement as being needed and worthwhile investments in the transportation system that are not supported under existing funding requirements or allocation levels; and

**Whereas**, projects contained within this 2025-2030 Transportation Improvement Program collectively advance performance targets collectively identified by A/GFTC, New York State Department of Transportation, and Capital District Transportation Authority designed to attain measurable outcomes with regard to infrastructure conditions, safety, and system performance; so

**Now Be It Therefore Resolved**, that the Adirondack/Glens Falls Transportation Council endorses the 2025-2030 Transportation Improvement Program, 2025 Self-Certification, and Albany-Schenectady-Troy 1997 8-Hour Ozone Non-Attainment Area Transportation / Air Quality Conformity Determination; and

**Be It Further Resolved**, that any projects in the 2022-2027 Obligated Element of the TIP that are not obligated by October 1, 2025 are to become part of Federal Fiscal Year 2025-26 or beyond as appropriate and as fiscal constraint allows; and

**Be It Further Resolved**, that the Adirondack/Glens Falls Transportation Council certifies that the requirements of 23 CFR Part 450.114(c) have been met; and

**Be It Further Resolved**, that in accordance with FTA regulations, the Council certifies that the population and square mileage of the CDTA service area as well as the planning procedures used to determine the service area that are reported in the Transit element within this TIP are accurate; and

**Be It Further Resolved**, that the Council Secretary is directed to transmit this 2025-2030 Transportation Improvement Program to the Commissioner of the New York State Department of Transportation and to the Regional Administrator of the Federal Transit Administration.

---

**Robert Henke**  
**Chairman, Washington County Board of Supervisors**  
**Chairman, A/GFTC Policy Committee**

---

**Date**

## **Overview of the Adirondack / Glens Falls Transportation Council**

The Adirondack / Glens Falls Transportation Council (A/GFTC) is the Metropolitan Planning Organization (MPO) designated by the Governor of the State of New York for the area that includes Warren and Washington Counties as well as the Town of Moreau in Saratoga County. A/GFTC has the responsibility of developing and maintaining both a Regional Transportation Plan and a Transportation Improvement Program (TIP) for the area's federal aid eligible highway and public transit facilities.

The Council was established in 1982 when the population of the Glens Falls urbanized area exceeded 50,000 as determined by the 1980 Census. At that time, the geographic area for transportation planning was limited to the Census-defined urbanized area. In 1993, the Council voted to expand its coverage to include the rural areas of Warren and Washington Counties and the entire town of Moreau in Saratoga County, as shown in the map at right. The official name of the Council was later formally changed to the Adirondack / Glens Falls Transportation Council to reflect that expansion.

A/GFTC consists of two principal working groups: the Policy Committee and the Planning Committee. The Policy Committee is responsible for reviewing and approving all core documents and major planning efforts undertaken by the Council and its staff. This committee's membership includes the Chairpersons of the Boards of Supervisors of Saratoga, Warren, and Washington Counties, the chief elected officials from all urban area cities, towns and villages (Glens Falls, Queensbury, Lake George, Bolton, Fort Ann, Fort Edward, Kingsbury, Hudson Falls, Moreau, and South Glens Falls), the Chairperson of the Lake Champlain-Lake George Regional Planning Board, the Regional Director from Region One of the New York State Department of Transportation, the CEO of the Capital District Transportation Authority, and the Eastern Region Canal Engineer of the New York State Canal Corporation. In addition, Warren and Washington Counties each appoint one Town Supervisor from outside of the Glens Falls Urban Area to act as rural representatives. The Federal Highway Administration and the Federal Transit Administration also provide representation to the A/GFTC Policy Committee as advisory members.

Policy Committee members designate a representative to serve on the A/GFTC Planning Committee. Planning Committee members assume an active role in the development of plans and programs dealing with local transportation issues and addressing current and potential problems with the state and local highway network and the operation of the area's transit service. Through the intergovernmental forum of A/GFTC, local and regional transportation issues are discussed and transportation policies and programs are developed. The result of these planning activities is documented in the A/GFTC Long Range Plan and in this Transportation Improvement Program.

### **Transportation Improvement Program (TIP)**

The Transportation Improvement Program (TIP) is a five-year capital improvement program that identifies planned federal highway and transit expenditures towards surface transportation projects that have been selected through the MPO process. The inclusion of a project in this document allows specific project development, design, and construction activities to proceed using federal funds according to the defined schedule. The TIP provides information regarding federal funding assistance and project costs for Federal Fiscal Years 2025-26 through 2029-30. A/GFTC updates the TIP every two to three years to maintain a current list of projects and to reflect its Long Range Transportation Plan (LRP) for the area. The LRP is a planning tool that integrates short-term operational concerns with longer-term system capacity and maintenance issues for the region.

Projects that appear in the first four years of the TIP are incorporated into the New York State Statewide Transportation Improvement Program (STIP) and generally have priority for funding. Projects that appear in later years may be advanced into the STIP timeframe by the amendment process if changes in the first four years of the programming occur so that resources are reasonably available to implement the program.

### **Programming Guidance and Instruction**

As included 23 USC 134 (Metropolitan transportation planning), the following federal transportation planning and programming factors were considered in formulating the A/GFTC TIP; the overall capital project roster supports continued gains in these categories:

- (A) support the economic vitality of the metropolitan area, especially by enabling global competitiveness, productivity, and efficiency;*
- (B) increase the safety of the transportation system for motorized and nonmotorized users;*
- (C) increase the security of the transportation system for motorized and nonmotorized users;*
- (D) increase the accessibility and mobility of people and for freight;*
- (E) protect and enhance the environment, promote energy conservation, improve the quality of life, and promote consistency between transportation improvements and State and local planned growth and economic development patterns;*
- (F) enhance the integration and connectivity of the transportation system, across and between modes, for people and freight;*
- (G) promote efficient system management and operation; and*
- (H) emphasize the preservation of the existing transportation system.*
- (I) improve the resiliency and reliability of the transportation system and reduce or mitigate storm water impacts of surface transportation; and*
- (J) enhance travel and tourism.*

### **How Projects Are Selected for Funding**

Prior to the programming of any new projects for this update, projects with existing commitments from the 2022-2027 TIP were reviewed and updated. Some projects required rescheduling and others needed cost revisions. While adjusting the program to reflect changes in costs, schedules, and priorities, a concerted effort was made to maintain funding allocations within this TIP in accordance with fiscal constraints.

An open solicitation for new project candidates was conducted with A/GFTC-area project sponsors in late 2024. The roster of projects included within this TIP is reflective of the results of that solicitation, input from NYSDOT, and committee-level discussion and review of the candidate projects.

Project needs that exceed present resources have been identified as illustrative projects. These projects were proposed for the current or previous TIP periods or have emerged from A/GFTC planning initiatives and have been considered by A/GFTC and acknowledged as being valuable investments in the transportation system. Financial constraints, regulatory limitations, and programming strategies require that those projects be delayed until adequate funding or programming capacity becomes available. Should additional resources materialize, these projects could be considered as candidates for programming provided that fiscal constraint is preserved within the overall program.

### **Amending the Transportation Improvement Program**

This Transportation Improvement Program is a staged, multi-year program of transportation improvement projects developed through a cooperative planning process by A/GFTC and federal, state, regional and local participants. Projects are reviewed and evaluated by the Planning Committee and recommended for adoption by the Policy Committee. The adopted TIP must be fiscally constrained to the federal transportation funds that are projected to be available in each year of the program. Changes to the TIP Table of Projects (including scope, year of work, cost or addition of new projects) require the review and approval of the Planning and/or the Policy Committee depending on the nature and scale of the amendment (specific procedural requirements are shown on the following page). Minor changes may be approved by NYSDOT or A/GFTC staff with consultation and consent of sponsors. More significant changes require approval by the Policy Committee. Changes that require Policy Committee consideration are formal amendments and are therefore subjected to public review and comment opportunity prior to adoption.

## Guidelines for Changes to the A/GFTC TIP

Type of Change	Type of Action		Responsibility		
	Administrative Modification	TIP Amendment	A/GFTC or NYSDOT	Planning Committee	Policy Committee
<b>1. Addition or alteration</b>					
a) Add project from regional setasides or statewide award	<input checked="" type="checkbox"/>			Approve	
b) Add new project, not from setaside or Illustrative Project list		<input checked="" type="checkbox"/>		Recommend	Approve
c) Withdraw project at sponsor request	<input checked="" type="checkbox"/>			Approve	
d) Add project from Illustrative Project list to TIP	<input checked="" type="checkbox"/>			Approve	
d) Add project element ≤ \$500m	<input checked="" type="checkbox"/>		Approve		
e) Add project element over \$500m ≤ \$2.0m	<input checked="" type="checkbox"/>			Approve	
f) Add project element over \$2.0m		<input checked="" type="checkbox"/>		Recommend	Approve
g) Other		<input checked="" type="checkbox"/>		Recommend	Approve
<b>2. Scope and Cost</b>					
a) Cost Change <\$0.500M	<input checked="" type="checkbox"/>		Approve		
b) Cost change > \$0.500M and <\$2.0M	<input checked="" type="checkbox"/>			Approve	
c) Cost change > \$2.0M		<input checked="" type="checkbox"/>		Recommend	Approve
d) Significant scope change	<input checked="" type="checkbox"/>			Approve	
e) Combining or separating PINs at sponsor request	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Approve		Approve
<b>3. Fund Source Change</b>					
a) Change between FHWA fund sources	<input checked="" type="checkbox"/>		Approve		
b) Change between FTA fund sources	<input checked="" type="checkbox"/>		Approve		
c) Change from non-federal to federal funding		<input checked="" type="checkbox"/>		Recommend	Approve
d) Change from federal to non-federal funding	<input checked="" type="checkbox"/>		Approve	Approve	
e) Any other federal fund source change		<input checked="" type="checkbox"/>		Recommend	Approve
<b>4. Schedule Change</b>					
a) All affected (AQE) project elements are included in the first four years of the TIP before & after the proposed change	<input checked="" type="checkbox"/>		Approve		
(b) Any other schedule change	<input checked="" type="checkbox"/>			Approve	

ALL TIP **AMENDMENTS** REQUIRE PUBLIC REVIEW AND COMMENT PRIOR TO POLICY COMMITTEE CONSIDERATION

Notes:

1. Planning Committee may choose to defer any proposed action to the Policy Committee as it deems appropriate
2. Changes that require Policy Committee action are considered to be TIP amendments
3. A project element refers to a project phase such as design or construction
4. A significant scope change is a major change to a project's limits, type, or original scope
5. Projects listed in Years 1-4 of the TIP are included in the STIP as needed and eligible for programming adjustments via established Project Selection criteria.

Updated April 2025

## **Project Funding Categories**

The following abbreviations appear in the project listings as federal funding sources. Links to the federal descriptions of each category are included. Certain non-federally funded transportation - related projects may also be listed within the TIP for informational purposes.

### **Federal Funding Categories & Abbreviations**

#### ***Federal Highway Administration (FHWA)***

- HSIP -**        [Highway Safety Improvement Program](#): funding for projects designed to achieve significant reductions in traffic fatalities and serious injuries on all public roads
- NHPP-**        [National Highway Performance Program](#): funding for projects that support progress toward achievement of national performance goals for improving infrastructure condition, safety, mobility, or freight movement on the National Highway System, consistent with Metropolitan and Statewide planning requirements.
- STBG –**        [Surface Transportation Block Grants \(flexible\)](#): funding for road and bridge projects along any federal-aid eligible roadway. Eligible for transfer to transit capital purposes when warranted.
- BFP -**        [Bridge Formula Program](#): funding to replace, repair, rehabilitate or construct highway bridges, including structures that do not carry or cross components of the federal aid eligible highway network

#### ***Federal Transit Administration (FTA)***

- 5307 –**        [Urbanized Area Formula Funding](#): Eligible to be used for capital purchases and/or to defray transit operating expenses. Also includes FTA 5340 (Growing States and High Density States Formula Program).
- 5310 -**        [Enhanced Mobility of Seniors and Individuals with Disabilities](#): **Intended to** meet the transportation needs of older adults and people with disabilities when the existing public transportation services are unavailable, insufficient, or inappropriate.
- 5339 -**        [Buses and Bus Facilities](#): Provides funding to states and transit agencies to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities.

### **Funding Balance and Fiscal Constraint**

Federal transportation law, *the Infrastructure Investment and Jobs Act*, requires that each MPO TIP be balanced and fiscally constrained to the amount of federal funds that are reasonably expected to be available over the TIP period. A/GFTC is included in NYSDOT Region 1; that area also includes the Capital District and Essex and Greene Counties. This document has been prepared in consultation with Region 1 staff to determine expected funding availability. Data listed in this TIP will be used in the development of the Region's program and the Statewide TIP (STIP), also required to be balanced and fiscally constrained. A fiscal constraint table that demonstrates that programming proposed by this TIP is

within suballocated planning targets as agreed upon by NYSDOT and A/GFTC is provided at the end of the project listings (*Appendix A*).

### **Air Quality Impacts of the TIP**

The A/GFTC Planning and Programming Area includes Warren County and Washington County and the Town of Moreau in Saratoga County. Warren and Washington Counties are designated as attainment areas for air quality standards by the US Environmental Protection Agency. Saratoga County (including the Town of Moreau ), as part of the Albany-Schenectady-Troy area, had been designated as a marginal non-attainment area for ozone prior to July 2012. The Capital Region Transportation Council (CRTC) carries out conformity testing for all of Saratoga County in cooperation with A/GFTC. In July of 2012, the United States Environmental Protection Agency revoked the Transportation Conformity requirements for 1997 8-Hour Ozone National Ambient Air Quality Standards (NAAQS). The Albany-Schenectady-Troy area is air quality attainment for the 2008 8-Hour Ozone NAAQS. The transportation air quality conformity determination for the nine-county Albany-Schenectady-Troy, NY ozone nonattainment area is included as *Appendix C*.

### **Community Participation**

Public involvement and consensus are important and ongoing elements of the A/GFTC planning process. The A/GFTC planning process strives to be all-inclusive of area community transportation interests. Beyond the representation included in its Planning and Policy Committees, A/GFTC seeks additional public input through a variety of media that include attendance at area community expositions and fairs, contact with area print and radio media, distribution of documents and plans as they are developed, and opinion surveys and direct mailings. Feedback received during that Long Range Plan planning process affirms that the project priorities programmed in this document as being current and relevant.

### **Performance Targets**

Pursuant to federal requirements, MPOs must employ a transportation performance management approach in carrying out their federally-required planning and programming activities. Chapter 23 part 150(b) of the *United States Code* [23USC §150(b)] includes the following seven national performance goals for the Federal-Aid Highway Program:

- Safety – To achieve a significant reduction in traffic fatalities and serious injuries on all public roads.
- Capital Assets Condition – To maintain the highway infrastructure and transit capital asset systems in a state of good repair.
- Congestion Reduction – To achieve a significant reduction in congestion on the National Highway System.
- System Reliability – To improve the efficiency of the surface transportation system.
- Freight Movement and Economic Vitality – To improve the national freight network, strengthen the ability of rural communities to access national and international trade markets, and support regional economic development.
- Environmental Sustainability – To enhance the performance of the transportation system while protecting and enhancing the natural environment.
- Reduced Project Delivery Delays – To reduce project costs, promote jobs and the economy, and expedite the movement of people and goods by accelerating project completion through eliminating delays in the project development and delivery process, including reducing regulatory burdens and improving agencies' work practice

Regarding public transportation, transportation performance management shall be utilized to advance the general policy and purposes of the public transportation program as included in 49USC §5301(a) and (b).

The A/GFTC TIP was developed and is managed in cooperation with the New York State Department of Transportation (NYSDOT) and Capital District Transportation Authority. It reflects the investment priorities established in the *2045 Ahead*, A/GFTC's Long Range Plan for the region, that incorporates comments and input from affected agencies and organizations and the public.

TIPs "shall include, to the maximum extent practicable, a description of the anticipated effects of the transportation improvement program toward achieving the performance targets established in the metropolitan transportation plan, linking investment priorities to those performance targets" [23USC §134(j)(2)(D)]. TIPs and metropolitan transportation plans (MTPs) must include performance targets for the associated measures:

- Highway Safety (PM 1)
- Transit Asset Management
- Pavement and Bridge Condition (PM 2)
- Transit Safety
- July 20, 2021 – Public Transportation Agency Safety Plan

This portion of the TIP meets the requirements of 23USC §134(j)(2)(D).

### **HSIP and Highway Safety**

#### *Performance Targets*

On March 15, 2016, FHWA published the final rule for the HSIP and Safety Performance Management (Safety PM) Measures in the *Federal Register* with an effective date of April 14, 2016.

The 2023 New York Strategic Highway Safety Plan (SHSP) is intended to reduce the number of fatalities and serious injuries resulting from motor vehicle crashes on public roads in New York State. The SHSP guides NYSDOT, the MPOs, and other safety partners in addressing safety and defines a framework for implementation activities to be carried out across New York State. The NYSDOT HSIP annual report documents the statewide performance targets.

A/GFTC agreed to support the NYSDOT statewide 2025 targets for the following Safety PM measures based on five-year rolling averages per Title 23 Part 490.207 of the *Code of Federal Regulations* on December 11, 2024 via Resolution 24-04:

<b>Performance Measure</b>	<b>NY Statewide Target 2022</b>
Number of Fatalities	1,011.0
Rate of Fatalities per 100 million Vehicle Miles Traveled (VMT)	0.881
Number of Serious Injuries	11,034.1
Rate of Serious Injuries per 100 million VMT	9.557
Number of Nonmotorized Fatalities and Serious Injuries	2,615.2

### *Anticipated Effects*

Safety is a critical component of A/GFTC's mission and is a primary consideration in the selection of projects to be included in the TIP. HSIP funds will be programmed on a collaborative, regional approach to address site-specific and systemics safety deficiencies. A Comprehensive Safety Action Plan for the A/GFTC region is currently under development and will ultimately serve as an additional guide to the effective programming of safety projects in the area. The TIP includes projects that are expected to materially benefit the safety of the traveling public throughout the metropolitan planning area. The anticipated effect of the overall program is that it will contribute toward achieving NYSDOT's safety performance targets.

### **Transit Asset Management**

#### *Performance Targets*

On July 26, 2016, the Federal Transit Administration (FTA) published the final Transit Asset Management rule. This rule applies to all recipients and subrecipients of Federal transit funding that own, operate, or manage public transportation capital assets. The rule defines the term "state of good repair" (SGR), requires that public transportation providers develop and implement transit asset management (TAM) plans, and establishes performance measures for four transit asset categories: rolling stock, equipment, transit infrastructure, and facilities. The rule became effective on October 1, 2016.

Public transportation providers must establish TAM targets annually for the following fiscal year and report those to FTA. Each provider shares its targets with the MPO in which the provider's projects and services are programmed in the MPO's TIP. The MPO is required to establish its first set of TAM targets within 180 days of the date that public transportation provider established its first targets. After this, MPOs are not required to establish TAM targets each year after the transit provider establishes targets. Instead, MPOs must set updated TAM targets when the MPO updates its LRTP.

When establishing transit asset management targets, the MPO can either agree to program projects that will support the transit provider targets or establish its own separate transit asset management targets for the MPO planning area.

FTA defines two tiers of public transportation providers based on size parameters. Tier I providers are those that operate rail service or more than 100 vehicles in all fixed route modes, or more than 100 vehicles in one non-fixed route mode. Tier II providers are those that are a subrecipient of FTA 5311 funds, or a State or Indian Tribe, or have 100 or less vehicles across all fixed route modes, or have 100

vehicles or less in one non-fixed route mode. Tier I providers must establish their own transit asset management targets, while Tier II providers have the option to establish their own targets or to participate in a group plan with other Tier II providers whereby targets are established by a plan sponsor for the entire group. A state DOT is typically the group TAM plan sponsor.

A/GFTC has the following transit providers operating in the planning area:

- Capital District Transportation Authority, Tier 1

The 2025 update to CDTA's Transit Asset Management Plan set the following transit asset management targets for 2025:

Asset Category - Performance Measure	Type	Revenue Vehicles By Mode	Asset Class	Useful Life Benchmark (Years)	2025 Target
<b>Rolling Stock</b>					
Age - % of revenue vehicles within a particular asset class that have met or exceeded their Useful Life Benchmark (ULB)	Transit Coach	Bus - Articulated (60 foot)	Articulated Bus	14	0%
		Bus - BRT	Bus	14	10%
		Bus - Hybrid (30 foot)	Bus	14	0%
		Bus - Hybrid (40 foot)	Bus	14	60%
		Bus - Large Bus (30 foot)	Bus	14	0%
		Bus - Large Bus (40 foot)	Bus	14	0%
	Transit Commuter	Bus - Commuter (40-45 ft)	Over-the-Road Bus	14	15%
		Bus Medium (26-29)	Cutaway Bus	14	0%
	Paratransit	Bus - Small Bus (20-25 ft)	Minibus	8	0%
	Trolley	Trolley	Trolleybus	8	23%
	Microtransit	Bus - Small Bus (20-25 ft)	Minibus	8	0%
	Other (Define)	Other (Define)	Other (Define)		
<b>Equipment</b>					
Age - % of non-revenue vehicles within a particular asset class that have met or exceeded their ULB	Non-Revenue	Car/Van/SUV	Automobile	8	20%
		Non-Revenue	Automobile	8	20%
		Truck - (1) Light Duty	Automobile	8	38%
		Truck - (2) Medium Duty	Automobile	8	0%
		Truck - (3) Heavy Duty	Automobile	8	0%
		Truck - (4) Heavy Heavy Duty	Automobile	8	100%
	Service Truck	Non-Revenue	Automobile	8	20%
	Forklift	Non-Revenue	Automobile	8	20%
	Wheel Polisher	(blank)	(blank)	8	0%
			Other (Define)		%
<b>Facilities</b>					
Condition - % of facilities with a condition rating below 3.0 on the FTA TERM Scale	Administration & Maintenance	Albany Transportation Building (110 Watervliet Avenue)		n/a	5%
		Albany Planning & Marketing Building (85		n/a	0%
		Troy Transportation Building		n/a	0%
		Schenectady Transportation Building		n/a	50%
		Rensselaer Rail Station		n/a	0%
		Saratoga Rail Station		n/a	0%
	Parking Structures			n/a	%
	Passenger Facilities			n/a	%
	Shelters			n/a	%
	Other (Define)			n/a	%

A/GFTC has agreed to support these transit asset targets via Resolution 25-04 on May 8, 2025. With this action, the A/GFTC agrees to plan and program projects in the TIP that will, once implemented, make progress toward achieving the transit asset targets.

## *Anticipated Effects*

The A/GFTC TIP was developed and is managed in cooperation with the CDTA. The TIP includes specific investment priorities that support the MPO's goals, including transit asset management, using a project selection process that is anticipated to address transit SGR in the MPO planning area. The MPO's goal of addressing transit asset condition is linked to the investment plan of CDTA, and the process used to prioritize the projects within the TIP is consistent with federal requirements.

The focus of A/GFTC's investments that address transit SGR include:

- Repair, rehabilitation, and replacement of transit facilities;
- Preventative maintenance of transit facilities and vehicles;
- Bus and trolley replacements;
- Support vehicle replacements; and
- Passenger facility improvements

A/GFTC anticipates that the projects in the TIP, once implemented, will contribute toward achieving the established transit asset management targets. Improving the SGR of transit capital assets is an overarching goal of the MPO.

## **Pavement and Bridge Condition**

### *Performance Targets*

On January 18, 2017, FHWA published the Pavement and Bridge Condition Performance Measures Final Rule in the *Federal Register*. This established six performance measures to assess pavement conditions and bridge conditions for the National Highway Performance Program (NHPP).

The pavement condition measures represent the percentage of lane-miles on the Interstate and non-Interstate National Highway System (NHS) that are in good or poor condition. FHWA established five pavement condition metrics<sup>1</sup>: International Roughness Index (IRI); cracking percent; rutting; faulting; and Present Serviceability Rating (PSR). FHWA set a threshold for each metric to establish good, fair, or poor condition. Each section of pavement is classified as being in good condition or poor condition based upon the ratings of the metrics applicable to that pavement type. Pavement sections that are not good or poor condition are classified as fair.

The bridge condition measures represent the percentage of bridges, by deck area, on the NHS that are in good condition or poor condition<sup>2</sup>. The condition of each bridge is evaluated by assessing four bridge components: deck, superstructure, substructure, and culverts. The Final Rule created a metric rating threshold for each component to establish good, fair, or poor condition. If the lowest rating of the four metrics is greater than or equal to seven, the structure is classified as good. If the lowest rating is less than or equal to four, the structure is classified as poor. If the lowest rating is five or six, it is classified as fair.

---

<sup>1</sup> Per FHWA, "To ensure consistent definitions, a distinction between 'performance measure' and 'performance Metric' was made in 23 CFR 490.101. A 'metric' is defined as a quantifiable indicator of performance or condition whereas a 'measure' is defined as an expression based on a metric that is used to establish targets and to assess progress toward meeting the established targets." (*FHWA Computation Procedure for the Pavement Condition Measures – FHWA-HIF-18-022*, FHWA Office of Infrastructure and Office of Policy & Governmental Affairs, April 2018)

<sup>2</sup> The sum of total deck area of good or poor NHS bridges is divided by the total deck area of all bridges carrying the NHS to determine the percent of bridges in good or in poor condition. Deck area is calculated by multiplying the structure length by either the deck width or approach roadway width.

In October 2024, NYSDOT issued a Mid-Performance Period Progress Report that updated or retained the following statewide pavement condition performance targets. A/GFTC agreed to support these NYSDOT statewide targets on December 11, 2024 via Resolution 24-04.

Performance Measures	Baseline	2-Year Condition/ Performance	2-Year Target	4-Year Target	4-Year Adjustment
Percentage of Pavements of the Interstate System in Good Condition	45.3%	50.7%	53.2%	54.3%	48.2%
Percentage of Pavements of the Interstate System in Poor Condition	1.1%	1.0%	1.4%	1.7%	1.6%
Percentage of Pavements of the Non- Interstate NHS in Good Condition	18.9%	20.3%	22.3%	20.7%	18.6%
Percentage of Pavements of the Non- Interstate NHS in Poor Condition	7.6%	7.1%	9.3%	10.9%	8.4%

The following statewide bridge condition performance targets were reaffirmed in the October 2024 NYSDOT Mid-Performance Period Progress Report and were supported by A/GFTC via Resolution 23-03 dated April 13, 2023:

Performance Measure	2021 Baseline	2023 Target	2025 Target
Percentage of NHS Bridges Classified as in Good Condition	25.3%	24.1%	21.1%
Percentage of NHS Bridges Classified as in Poor Condition	11.3%	12.5%	12.8%

### *Anticipated Effects*

Maintaining (and, where possible, improving) the condition of NHS pavements and bridges is a critical component of A/GFTC's mission, and the projects on the TIP are consistent with the need to address the condition of these infrastructure assets. Highway and bridge conditions are primary considerations in the selection of projects to be included in the TIP. The TIP includes projects programmed with NHPP funds and other fund sources to address and prevent deterioration of NHS facilities.

A/GFTC anticipates that the projects in the TIP, once implemented, will contribute toward achieving NYSDOT's pavement and bridge condition targets.

### **System Performance, Freight, and Congestion Mitigation and Air Quality**

#### *Performance Targets*

On January 18, 2017, FHWA published the system performance, freight, and CMAQ Performance Measures Final Rule in the *Federal Register*. This third and final FHWA performance measure rule, which has an effective date of May 20, 2017 (originally February 17, 2017), established six performance measures to assess the performance of the NHS, freight movement on the Interstate System, and traffic congestion and on-road mobile source emissions for the CMAQ Program.

There are two NHS performance measures that represent the reliability of travel times for all vehicles on the Interstate and non-Interstate NHS. FHWA established the Level of Travel Time Reliability (LOTTR) metric to calculate reliability on both the Interstate and non-Interstate NHS. LOTTR is defined as the ratio of longer travel times (80th percentile) to a normal travel time (50th percentile) during four time

periods from the hours of 6 AM to 8 PM each day (AM peak, midday, and PM peak on Mondays through Fridays and weekends). The LOTTR ratio is calculated for each segment of applicable roadway. A segment is reliable if its LOTTR is less than 1.5 during all time periods. If one or more time periods has a LOTTR of 1.5 or above, that segment is unreliable. The measures are expressed as the percentage of person-miles traveled on the Interstate and non-Interstate NHS that are reliable.

The freight movement performance measure represents the reliability of travel times for trucks on the Interstate system. FHWA established the Truck Travel Time Reliability (TTTR) Index, which is defined as the ratio of longer truck travel times (95th percentile) to a normal truck travel time (50th percentile). The TTTR Index is calculated for each segment of the Interstate system over five time periods from all hours of each day (AM peak, midday, and PM peak on Mondays through Fridays, overnights for all days, and weekends). The highest TTTR Index value among the five time periods is multiplied by the length of the segment, and the sum of all length-weighted segments is then divided by the total length of Interstate to generate the TTTR Index.

There are three traffic congestion and on-road mobile source emissions performance measures that represent peak hour excessive delay per capita (PHED), non-single occupancy vehicle (SOV) travel, and total on-road mobile source emissions reductions. A/GFTC meets all current air quality standards and is not subject to establishing targets for these performance measures.

NYSDOT established the statewide system performance and freight performance targets in the table below on December 16, 2022. A/GFTC agreed to support the NYSDOT statewide targets on via Resolution 23-03 dated April 13, 2023

Performance Measure	2021 Baseline	2023 Target	2025 Target
Percent of Person-Miles Traveled on the Interstate that are Reliable	82.2%*	75.0%	75.0%
Percent of Person-Miles Traveled on the Non-Interstate NHS that are Reliable	85.7%	70.0%	70.0%
Truck Travel Time Reliability Index	1.38^	2.00	2.00

\*Baseline will be adjusted to 81.6 ^Baseline will be adjusted to 1.39

### *Anticipated Effects*

Providing for the reliable movement of people and goods is a critical component of A/GFTC's mission, and the projects on the TIP are consistent with the need to address the reliability of travel times for vehicles, including trucks. These are primary considerations in the selection of projects to be included in the TIP. The TIP includes projects programmed with funds from various funding programs that have benefits to reliability in travel times for people and freight, including improvements to the NHS.

A/GFTC anticipates that the projects in the TIP, once implemented, will contribute toward achieving NYSDOT's system performance and freight performance targets.

## **Transit Safety**

### *Performance Targets*

The Federal Transit Administration (FTA) published a final Public Transportation Agency Safety Plan (PTASP) rule on July 19, 2018. Under this rulemaking, providers of public transportation systems that are a recipient or sub-recipient of FTA Urbanized Area Formula Grant Program funds under 49 U.S.C. Section 5307, or that operate a rail transit system that is subject to FTA's State Safety Oversight Program, must develop and implement a PTASP based on a Safety Management Systems (SMS) approach. As it relates to this documentation, each PTASP must include performance targets based on the safety performance measures established in FTA's National Public Transportation Safety Plan (NSP). Other elements of a PTASP include but are not limited to approval by the agency's Accountable Executive and Board of Directors, designation of a Chief Safety Officer, documented processes of the agency's SMS, an employee reporting program, and process and timeline for annual reviews and updates of the PTASP.

Providers subject to the rule must annually certify a PTASP, including targets for transit safety measures that cover fatalities, injuries, safety events, and system reliability. Upon establishing transit safety targets, a public transportation provider must make the targets available to the MPO in which the provider's projects and services are programmed in the MPO's TIP. The MPO is required to establish its first set of transit safety targets within 180 days of the date that provider established its first targets. After this, MPOs are not required to establish transit safety targets each year after the transit provider establishes targets. Instead, MPOs must set updated targets when the MPO updates its LRTP.

An MPO must reflect the transit safety targets in any LRTP and TIP updated on or after July 20, 2021. When establishing transit safety targets, the MPO can either agree to program projects that will support the transit provider targets or establish its own separate targets for the MPO planning area.

The following transit providers subject to the PTASP rule operate in the A/GFTC planning area:

- Capital District Transportation Authority (CDTA)

CDTA is responsible for developing a PTASP and establishing transit safety targets. The December 2024 CDTA PTASP, endorsed by A/GFTC via Resolution 25-05 on May 8, 2025, establishes the following targets:

<b>Safety Performance Targets</b> <i>Specify performance targets based on the safety performance measures established under the National Public Transportation Safety Plan.</i>							
<b>Mode of Transit Service</b>	<b>Fatalities (Total)</b>	<b>Fatalities (Rate)</b>	<b>Injuries (Total)</b>	<b>Injuries (Rate)</b>	<b>Safety Events (Total)</b>	<b>Safety Events (Rate)</b>	<b>System Reliability</b>
Bus	0	0	51	7.0	49	6.3	17,400
Commuter Bus	0	0	2	6.9	3	10.4	70,000
Demand Response (Paratransit)	0	0	4	2.7	3	2.7	46,000
Demand Response – Taxi (Paratransit)	0	0	1	0.7	1	.07	0
Total	0	0	58	6.2	56	5.1	23,275

### *Anticipated Effects*

The A/GFTC TIP was developed and is managed in cooperation with CDTA. The TIP includes specific investment priorities that support the MPO's goals, including transit safety, using a project selection process that is anticipated to address transit operations in the MPO planning area. The MPO's goal of addressing transit safety is linked to the safety plans of the CDTA, and the process used to prioritize the projects within the TIP is consistent with federal requirements.

A/GFTC anticipates that the projects in the TIP, once implemented, will contribute toward achieving the established transit safety targets. A/GFTC will continue to coordinate with the region's transit provider(s) to improve the safety of travelers in the MPO planning area and maintain transit assets in a state of good repair.

draft

Notes on Project Listings:

- Project amounts are shown in \$M (ex: 9.375 = \$9,375,000). Unless otherwise noted, those amounts represent the total cost of the project inclusive of all applicable local, State and Federal shares.
- This document is listing of the total matched programming to be obligated before October 1, 2030. While the current program has been reviewed and approved by A/GFTC, no endorsement is given that this programming level is an adequate sum to allow our municipalities to completely address the transportation infrastructure needs that face the region.
- Projects listed in the Obligated column may be subject to rolling over or being carried forward into the current program years. Those projects may be given priority over other listed projects that have yet to be initiated. This may require that other project schedules be adjusted as necessary to preserve fiscal constraint and achieve the regional preservation target throughout the program.
- Project amounts were developed in State Fiscal Year 2025 dollars. The attached tables reflect Year of Expenditure (YoE) adjustments as recommended by NYSDOT as follows:

SFY 25-26	+ 4.0%
SFY 26-27	+ 2.0%
SFY 27-28	+ 2.0%
SFY 28-29	+ 2.0%
SFY 29-30	+ 2.0%

## Illustrative Highway and Bridge Projects

The following projects have been identified through ongoing discussions at A/GFTC as desired improvements to the transportation system. Currently, insufficient programming capacity exists to allow for the inclusion of these projects within the TIP. A/GFTC Policy Committee action (TIP amendments) are required in order to add illustrative projects to the list of programmed projects:

- U.S. Route 9 / NYS 149 / Exit 20 Congestion Improvements (Queensbury)
- U.S. Route 9 Congestion Improvements - Exit 17 to NYS 197, Town of Moreau
- Replacement of functionally obsolete bridges:
  - NYS 197 over the Hudson River (Fort Edward)
  - I-87 over Corinth Road (Exit 18) (Queensbury)
  - East Street over the Champlain Canal (Fort Edward)
- Exit 18 reconfiguration (Queensbury)
- Route 4 geometric improvements (Washington County)
- Glenwood Avenue reconstruction and rehabilitation, Phase 2 (Town of Queensbury)
- Bay Road reconstruction and rehabilitation (Town of Queensbury)

## Appendix B - A/GFTC Self-Certification

draft

## **Adirondack / Glens Falls Transportation Council**

### **2025 Self-Certification**

#### **A. Required Agreements**

The Adirondack/Glens Falls Transportation Council is the designated MPO for urban transportation planning and programming in the Glens Falls Urbanized Area. The Memorandum of Understanding (MOU) between the Glens Falls Urban Area Transportation Council (GFTC) and the Governor was signed in 1982 and amended in 1985. The MOU describes the roles of GFTC and responsibilities of GFTC and its committees. In October 1994, by resolution of the Council, the planning and programming boundaries were extended to the entirety of Warren and Washington Counties and the Town of Moreau in northern Saratoga County, and in March 1997 another resolution changed the name of the MPO to the Adirondack/Glens Falls Transportation Council (A/GFTC) to reflect the expanded planning and programming area.

As is the case with all MPOs in New York State, A/GFTC is not a legal entity in and of itself. It depends upon a host agency to provide payroll and legal services and to contract with consultants for planning studies. At its inception, the host agency for A/GFTC was the New York State Department of Transportation (NYSDOT). Due to a desire on the part of area governments to assert local ownership of the MPO, a change in the host agency arrangement was made in September 1996 that established the Lake Champlain - Lake George Regional Planning Board (RPB) as A/GFTC's host agency. The current staff positions (the Transportation Planning Director, the Senior Transportation Planner) are employed by the RPB and work in the A/GFTC staff office located in the City of Glens Falls at 11 South Street, Suite 203. The staff has the responsibility of producing the core documents required of the MPO (namely, the Long Range Plan, the Transportation Improvement Program, and the Unified Planning Work Program), managing consultant studies specified in the UPWP, conducting technical analyses, purchasing of supplies and equipment, and carrying out the balance of the duties necessary to function as an MPO. The RPB serves as a member of the various A/GFTC committees and provides payroll services, audits, accounting and legal services, and professional staff support for MPO activities. The RPB makes first instance payments of the bills for goods and services contracted for by A/GFTC. The host agency agreement between the RPB and NYSDOT was renewed in 2022 for a term of ten years, and a Host Agency MOU between A/GFTC and RPB was renewed in 2018. A Joint Cooperative Planning Agreement between A/GFTC, Greater Glens Falls Transit (GGFT) and NYSDOT was approved by A/GFTC's Policy Committee in January 2010. Since that time, the Capital District Transportation Authority (CDTA) has assumed operations as the local public transportation provider from GGFT. As of June 2025, the joint cooperative planning agreement is under development, with CDTA and A/GFTC having agreed upon a draft. The Performance Management Agreement between NYSDOT, CDTA, and A/GFTC was signed in May 2025.

#### **B. Planning and Technical Work**

##### **1. UPWP**

The Adirondack/Glens Falls Transportation Council adopted a Unified Planning Work Program for 2025-2026 in February 2025. The work program includes ongoing public participation activities, data collection and performance measurement tasks, traffic modeling, technical assistance to municipalities, Geographic Information system (GIS) work, and corridor-planning activities described in support of issues identified in the current A/GFTC Long Range Plan. The Local Transportation Planning and Engineering Assistance Program is also demand responsive to individual community requests and is

intended to help communities address issues in support of A/GFTC's regional goals, objectives, and principals.

## **2. Long Range Transportation Plan**

A/GFTC's Long Range Plan, *2045 Ahead*, was adopted by the Council in September 2023. The LRP listed all current State and Federal planning factors and emphasis areas as well as A/GFTC's own Twelve Planning Principles. Through analysis of data, regional priorities and projects are identified as candidates for implementation through A/GFTC's Unified Planning Work Program and Transportation Improvement Program. Thorough public outreach (including surveys and public meetings) was conducted to solicit input from individuals and public agencies. An update to the LRP will be initiated in 2028, with an anticipated horizon date of 2050.

## **3. The Transportation Improvement Program (TIP)**

The 2022-2027 Transportation Improvement Program is the current MPO capital program. It was approved by A/GFTC in June 2016. The draft 2025-2030 Transportation Improvement Program (TIP) was approved on May 8, 2025 for release for public review and comment. A conformity determination is included in the draft 2025-2030 TIP, resulting from the February 16, 2018 United States Court of Appeals for the District of Columbia Circuit in *South Coast Air Quality Mgmt. District v. EPA* ("South Coast II," 882 F.3d 1138) ruling stating that transportation conformity determinations must be made in areas that were either nonattainment or maintenance for the 1997 ozone national ambient air quality standard (NAAQS) and attainment for the 2008 ozone NAAQS when the 1997 ozone NAAQS was revoked. These conformity determinations are required in these areas after February 16, 2019. The Albany-Schenectady-Troy, NY area was nonattainment at the time of the 1997 ozone NAAQS revocation on April 6, 2015 and was also designated attainment for the 2008 ozone NAAQS on May 21, 2012. Therefore, per the *South Coast II* decision, this conformity determination is being made for the 1997 ozone NAAQS.

During development of the current and draft TIP update documents, fiscal constraint was applied in coordination with NYSDOT Region 1. A/GFTC worked closely with its members and NYSDOT Region 1 to identify appropriate projects for inclusion in the roster of projects and those that could be deferred because of program limitations. Through these and similar coordinated efforts the current TIP has remained both balanced and fiscally constrained. Individual projects are clearly identifiable and are consistent with the adopted A/GFTC Long Range Plan. TIP amendment procedures are consistent with guidance from federal regulatory agencies. The Annual Listing of Obligated Projects for the most recently completed federal fiscal year is available on A/GFTC's website and is updated annually.

A/GFTC's website features an interactive project viewer for the TIP, developed to enhance public information and address required visualization techniques. The viewer, based on the intuitive GoogleMaps platform, displays project data, financial information, maps, and photographs of planned and completed projects.

## **4. Technical Studies and Emphasis Areas**

Technical studies are proceeding consistent with the current UPWP. Targeted intersection evaluations and pedestrian safety improvement recommendations targeted safety evaluations are an emerging focus. Studies and projects completed or initiated during the last State Fiscal Year include:

- Completed an access analysis for the Glens Falls Middle School and High School.
- Completed the Village of Argyle Pedestrian Assessment.
- Completed the Town and Village of Fort Ann's Empire State Trail connection plan.
- Completed the Hudson Avenue intersections assessment in Glens Falls.
- Completed the FTA 5310 project review and selection process.
- Advanced a Bicycling and Pedestrian Connectivity Plan for the Town and Village of Greenwich.
- Initiated and advanced the Route 9 / Main Street corridor planning study for the Town of Warrensburg.
- Initiated and advanced a Complete Streets improvement study for the D&H rail trail and County Route 24 on behalf of the Village of Granville and Washington County.
- Initiated and advanced a Bicycling and Pedestrian Connectivity Plan for the selected areas in the Town of Queensbury.
- Initiated and advanced the Route 9 Corridor Study for the Village of South Glens Falls.
- Initiated and advanced a review of previous bicycling planning efforts for the City of Glens Falls.
- Initiated the CDTA stop improvements study.
- Continued to participate on the advisory committee of the SS4A Comprehensive Safety Action Plan administered by the Lake Champlain – Lake George Regional Planning Board.
- Continued to participate on the advisory committee of the Glens Falls Thriving Communities transit planning capacity building grant administered by the Lake Champlain – Lake George Regional Planning Board.
- Continued to collect, maintain, and disseminate transportation related data.
- Continued to update the TIP and STIP as warranted by project design developments.
- Provided transportation-related planning assistance to member municipalities as needed or requested.
- Updated remote meeting and communications technology infrastructure.
- Continued to participate in the NYS Association of MPOs Directors and Working Groups.

## **5. Special Considerations in the Transportation Planning Process**

**(a) Title VI:** A/GFTC is a designated sub-recipient under NYSDOT's DBE program and maintains ongoing compliance efforts. Title VI/DBE reports are submitted on a semi-annual basis to NYSDOT and the Council has also signed on to NYSDOT's DBE plan. A/GFTC has never received any discrimination complaints. The Environmental Justice review was updated in 2022 and will be periodically updated as plans, programs, and regional demographics change. Special considerations for elderly and disabled persons are consistent with ADA requirements and are provided in the transportation planning process and in community participation projects. Specific outreach to senior organizations was conducted as part of the LRP update, CHSTP update, and FTA 5310 solicitations. The CHSTP will be updated in calendar year 2026. A/GFTC public transit planning efforts includes consideration of services for elderly, disabled persons and for those who choose not to drive. In-person MPO meetings are always held in ADA-accessible facilities. Accessibility was a key criterion in determining A/GFTC's site selection for staff offices in 2010 and factored in the decision to renew the lease in 2020; several non-accessible site candidates were ruled out on that basis. ADA compliance is monitored through the ADA paratransit services offered by the local transit operator and staff review of federally funded projects and plans. A/GFTC continues to offer ADA Transition Plan assistance to participating municipalities on request, and has successfully assisted Warren County, Lake George, and the Village of Greenwich in formulating their plans. Periodic review of local demographics continues to suggest that ethnic populations are insufficiently large to warrant targeted Limited English Population programs. That data will be periodically reassessed in

conjunction with future updates to the Environmental Justice review.

- (b) **Private Operators** - Consideration is given to private transportation providers. Private transportation operators will be considered and involved in future planning efforts to develop additional services to rural areas, particularly as part of the update to the Coordinated Human Services Transportation Plan.
- (c) **Planning Factors** - Up-to-date State and Federal planning factors and emphasis areas are used to develop A/GFTC plans and programs and to guide project selection processes. A/GFTC staff continues to maintain its relationships with local land use planning organizations through communication and consultation.
- (d) **Congestion Management Process**— No process in place (not required for A/GFTC).
- (e) **Public Involvement** – The A/GFTC Public Participation Plan was updated and approved in 2023. A/GFTC solicits public involvement through media, public meetings, mailings, and at events where the public gathers. A/GFTC staff meets with local officials, participates in public meetings, and holds public information meetings and planning forums to involve the general public and concerned businesses and agencies. Efforts are made to involve freight and transit users in all corridor and related planning activities. All meetings of A/GFTC's Planning and Policy Committees are open to the public. Announcements are posted on social media and the A/GFTC website at least 14 days in advance of a scheduled regular meeting. The agendas for those meetings regularly include a section for visitors Issues. Legal notices are issued during the development of all core publications and major program amendments, announcing the opportunity for public review and comment. The A/GFTC website contains all recent MPO products, meeting minutes and the most current versions of annual or recurring documents. The website allows for public comment on publications and provides opportunities for the public to contact staff to ask questions about any transportation concerns they may have. A/GFTC staff also utilizes social media outlets to notify the public of ongoing activities.
- (f) The **Coordinated Human Services Transportation Plan** was adopted in 2022 and will be updated in calendar year 2026.

### **C. Administrative/Management**

1. Complete and comprehensive **Progress Reports** are prepared and submitted on an annual basis to FHWA and FTA.
2. **Bills** are submitted and paid based on the processing schedule of RPB. Vendor inquiries for delayed reimbursements are infrequent.
3. **Audits** are completed in a timely manner in conjunction with the host agency.
4. **Annual Program** is closed out within 3 years in cooperation with NYSDOT.
5. **MPO Budget** is regularly monitored via monthly billing reports and updated as needed.
6. **Consultant Selection Process** - A/GFTC developed a Procurement Policy in 2018, updated in 2019

and again in 2025, including a consultant selection process that is followed for all professional services agreements. Additional consideration is given to consultants that contain a minimum of 10% DBE participation.

7. **Central Staff/Host Relations** are positive. MPO staff are accorded equal status as RPB staff. RPB has long been a solid and responsive administrative entity for A/GFTC with regard to personnel administration, support, and retention. Quality office space and support services to accommodate A/GFTC staff and activities are provided. Staff has good political support within the planning and programming area.
8. **Decision Making** ability is effective in the A/GFTC area. The public is outspoken on many issues and members listen and fully consider expressed public concerns. Committees are competently and sufficiently staffed. Planning Committee meetings are well attended; reaching consensus decisions has not been an issue. The Policy Committee typically meets twice a year with additional meetings held if specific actions are required. Policy Committee meetings are generally well attended. Members are consulted frequently on regional and local matters concerning their jurisdictions.
9. **Governance** - In 2022, the A/GFTC host agency, the Lake Champlain/Lake George Regional Planning Board, renewed its agreement with NYSDOT through March 2032. The format of the new agreement was consistent with a new model developed by NYSDOT. The hosting arrangement allows A/GFTC staff to advance its work without any undue or inequitable influence from any particular member municipality. The Policy and Planning Committees have consistent and balanced representation from throughout the program area, including *all* urban area municipalities. A/GFTC's operating and staffing plans were last updated in 2000 and reconsidered as recently as December of 2018.
10. **Procurement** - A/GFTC developed a Procurement Policy in 2018, updated in 2019 and again in 2025, consistent with the procurement requirements of FTA funding recipients, including those listed within the FTA Circular Guidance 4220.1F, Third Party Contracting Requirements, and the FTA Master Agreement. FTA-related expenditures are documented. Procurements by A/GFTC utilizing FTA funds are infrequent.

## Appendix C – Air Quality Conformity Determination

draft

**Albany-Schenectady-Troy**

**in Montgomery, Greene, and Schoharie Counties**

Prepared by:

NYSDOT Environmental Science Bureau, Capital Region Transportation Council and A/GFTC  
in association with NYSDOT Regions 1, 2, and 9

## Executive Summary

The Capital Region Transportation Council (Transportation Council), formerly the Capital District Transportation Committee, and the Adirondack/Glens Falls Transportation Council (A/GFTC) have developed a draft 2025-2030 Transportation Improvement Program (TIP). Adoption of a new TIP requires the Transportation Council and A/GFTC, in cooperation with the New York State Department of Transportation (NYSDOT) Regions 1, 2 and 9, to adopt a new transportation air quality conformity determination for the seven-county Albany-Schenectady-Troy, NY ozone nonattainment area.

This report documents that the involved agencies have completed the transportation conformity process and confirms that the A/GFTC and Transportation Council Transportation Improvement Programs (TIPs) and metropolitan transportation plans (Plans) and projects in the non-urbanized portion of the Albany-Schenectady-Troy area meet all applicable transportation conformity requirements.

Clean Air Act (CAA) section 176(c) (42 U.S.C. 7506(c)) requires that federally funded or approved highway and transit activities are consistent with ("conform to") the purpose of the State Implementation Plan (SIP). Conformity to the purpose of the SIP means that transportation activities will not cause or contribute to new air quality violations, worsen existing violations, or delay timely attainment of the relevant National Ambient Air Quality Standards (NAAQS) or any interim milestones.

The United States Environmental Protection Agency's (EPA) transportation conformity rules, 40 CFR Parts 51.390 and 93, establish the criteria and procedures for determining whether TIPs, Plans and federally supported highway and transit projects conform to the SIP. Chapter 6 of the New York Codes Rules and Regulations (NYCRR) Subpart 240 (Part 240) is the SIP for transportation conformity consultation in New York State. Part 240 was approved by the USEPA, effective September 29, 2014. Part 240-2 identifies the agencies, procedures, and allocation of responsibilities for consultation and is consistent with consultation requirements in 40 CFR Part 93.105.

The consultation procedures were followed during the conformity determination process and are documented in the Section titled "Consultation" below. In summary, the Transportation Council, A/GFTC, and NYSDOT staff discussed the content of this air quality conformity determination with the New York State Interagency Consultation Group (ICG) for air quality conformity during the development of the Capital Program of Transportation Projects in Greene, Montgomery, and Schoharie Counties as well as the new A/GFTC and Capital Region Transportation Council TIPs and metropolitan transportation plans.

On February 16, 2018, the United States Court of Appeals for the District of Columbia Circuit in *South Coast Air Quality Mgmt. District v. EPA* ("South Coast II," 882 F.3d 1138) held that transportation conformity determinations must be made in areas that were either nonattainment or maintenance for the 1997 ozone NAAQS and attainment for the 2008 ozone NAAQS when the 1997 ozone NAAQS was revoked. The Albany-Schenectady-Troy, NY area was

nonattainment at the time of the 1997 ozone NAAQS revocation on April 6, 2015, and was also designated attainment for the 2008 ozone NAAQS on May 21, 2012. Therefore, per the *South Coast II* decision, this conformity determination is being made for the 1997 ozone NAAQS.

This conformity determination was completed consistent with CAA requirements, associated regulations at 40 CFR Parts 51.390 and 93, 6 NYCRR Part 240 and the *South Coast II* decision, as per the USEPA's *Transportation Conformity Guidance for the South Coast II Court Decision* issued on November 29, 2018.

### **Transportation Conformity Overview**

The concept of transportation conformity was introduced in the Clean Air Act (CAA) of 1977, which included a provision to ensure that transportation investments conform to the State Implementation Plan (SIP) for meeting the Federal air quality standards. Conformity requirements were made substantially more rigorous in the CAA Amendments of 1990. The transportation conformity regulations that detail the criteria and procedures to successfully comply with the CAA conformity provisions were first issued in November 1993 and have been amended several times. The regulations establish the criteria and procedures for transportation agencies to demonstrate that air pollutant emissions from metropolitan transportation plans, transportation improvement programs and projects are consistent with ("conform to") the State's air quality goals in the SIP.

Transportation conformity is required under CAA Section 176(c) to ensure that Federally-supported transportation activities are consistent with ("conform to") the purpose of a State's SIP. Transportation conformity establishes the framework for improving air quality to protect public health and the environment. Conformity to the purpose of the SIP means Federal Highway Administration (FHWA) and Federal Transit Administration (FTA) funding and approvals are given to highway and transit activities that will not cause new air quality violations, worsen existing air quality violations, or delay timely attainment of the relevant air quality standard, or any interim milestone.

### **Albany-Schenectady-Troy 1997 Ozone Nonattainment Area**

On June 15, 2004, the EPA designated the Albany-Schenectady-Troy, NY area consisting of Saratoga, Schenectady, Albany, Rensselaer, Montgomery, Greene, and Schoharie Counties nonattainment for the 1997 8-hour ozone standard (0.08 parts per million). This designation was based on the results of ambient air monitoring data collected by the New York State Department of Environmental Conservation from calendar years 2001-2003. These data established an 8-hour ozone "design value" of 0.087 ppm for the area. The current design value for the area, based on 2021-2023 data, is 0.062 ppm.

On July 20, 2012, the EPA designated the Albany-Schenectady-Troy, NY attainment for the 2008 ozone standard (0.075 ppm). The area was designated attainment for the 2015 ozone standard (0.070ppm) on January 16, 2018.

## **Transportation Conformity Requirements**

On November 29, 2018, EPA issued *Transportation Conformity Guidance for the South Coast II Court Decision*<sup>1</sup> (EPA-420-B-18-050, November 2018) that addresses how transportation conformity determinations can be made in areas that were nonattainment or maintenance for the 1997 ozone NAAQS when the 1997 ozone NAAQS was revoked but were designated attainment for the 2008 ozone NAAQS.

The transportation conformity regulation at 40 CFR 93.109 sets forth the criteria and procedures for determining conformity. The conformity criteria for long-range metropolitan transportation plans (MTPs) and TIPs include latest planning assumptions (93.110), latest emissions model (93.111), consultation (93.112), transportation control measures (93.113(b) and (c)), and emissions budget and/or interim emissions (93.118 and/or 93.119).

In orphan areas that have one or more Metropolitan Planning Organizations (MPOs), transportation conformity for transportation plans and TIPs for the 1997 ozone NAAQS can be demonstrated without a regional emissions analysis pursuant to 40 CFR 93.109(c). This provision states that the regional emissions analysis requirement applies one year after the effective date of EPA's nonattainment designation for a NAAQS and until the effective date of revocation of such NAAQS for an area. The 1997 ozone NAAQS revocation was effective on April 6, 2015, and the *South Coast II* decision upheld the revocation. As no regional emission analysis is required for this conformity determination, there is no requirement to use the latest emissions model, or budget or interim emissions tests.

Therefore, transportation conformity for the 1997 ozone NAAQS for the A/GFTC and Transportation Council TIPs and Plans, and the Capital Program of Transportation Projects in Greene, Montgomery and Schoharie Counties can be demonstrated by showing the remaining requirements in Table 1 in 40 CFR 93.109 have been met. These requirements, which are laid out in Section 2.4 of EPA's guidance and addressed below, are:

- Latest planning assumptions (93.110)
- Consultation (93.112)
- Transportation Control Measures (93.113)
- Fiscal constraint (93.108)

## **Latest Planning Assumptions**

The use of latest planning assumptions in 40 CFR 93.110 of the conformity rule generally apply to regional emissions analyses. In the 1997 ozone NAAQS areas, the use of latest planning assumptions requirement applies to assumptions about transportation control measures (TCMs) in an approved SIP. There are no TCMs in any SIP in the Albany-Schenectady-Troy, NY area. Thus, the latest planning assumption requirement is not applicable for this conformity determination.

---

<sup>1</sup> Available from <https://www.epa.gov/sites/production/files/2018-11/documents/420b18050.pdf>

## **Consultation**

The consultation requirements in 40 CFR 93.112 and 6 NYCRR Part 240 were addressed both for interagency consultation and public consultation.

Per 6 NYCRR Part 240, interagency consultation was conducted with the NYSDEC, NYSDOT, FHWA, FTA and USEPA. Representatives of these agencies comprise the Interagency Consultation Group (ICG) for air quality conformity in New York State.

On March 12, 2025, the ICG concurred with the classification of Capital Program of Transportation Projects in Greene County (NYSDOT Region 1), Montgomery County (NYSDOT Region 2) and Schoharie County (NYSDOT Region 9). There are no projects within the A/GFTC portion of Saratoga County. The ICG concurred with the classification of projects in the draft Capital Region Transportation Council TIP on April 2, 2025.

All projects on the TIPs, MTPs and Capital Programs are exempt for the purposes of transportation conformity as per 40 CFR Part 93, 6 NYCRR Part 240 and the interagency consultation process. A list of projects and their exempt codes is attached to the conformity statement.

Consistent with planning rule requirements in 23 CFR Part 450, the public was provided an opportunity to review and comment on the draft conformity determination and supporting documentation for at least thirty days in Month(s) Date 2025.

The draft conformity documentation will be posted to the A/GFTC, Transportation Council and NYSDOT web sites. Evidence of public notice will be attached to this final conformity documentation. Comments pending the public comment period.

## **Timely Implementation of TCMs**

There are no transportation control measures (TCMs) in the SIP for the Albany-Schenectady-Troy, NY 1997 ozone nonattainment area.

## **Fiscal Constraint**

Transportation conformity requirements in 40 CFR 93.108 state that transportation plans and TIPs must be fiscally constrained consistent with DOT's metropolitan planning regulations at 23 CFR Part 450. The Transportation Council's *New Visions 2050* MTP, the A/GFTC 2045 *Ahead* MTP and the 2025-2030 Transportation Council and A/GFTC TIPs are fiscally constrained, as demonstrated in the Transportation Council's *New Visions 2050* Financial Plan and the draft Transportation Council 2025-2030 TIP. The A/GFTC fiscal constraint demonstration is included in Appendix A of the A/GFTC TIP document.

## Conclusion

The conformity determination process completed for the 2025-2030 A/GFTC and Transportation Council TIPs, the A/GFTC 2045 Ahead MTP, the Transportation Council New Visions 2050 MTP, and the Capital Program of Transportation Projects in Greene, Montgomery and Schoharie Counties demonstrates that these planning documents meet the Clean Air Act and Transportation Conformity rule requirements for the 1997 ozone NAAQS. The signed resolutions adopting this conformity determination are included in the final conformity documentation.

### **EXEMPT PROJECTS**

Highway and transit projects of the types listed below are exempt from the requirement to determine conformity. Such projects may proceed toward implementation even in the absence of a conforming transportation plan and TIP. However, a particular action of the type listed below is not exempt if the MPO, in consultation with the ICG, concurs that it has regionally significant emissions impacts.

The following coded list of exempt projects is derived from "Table 2 - Exempt Projects" in 40 CFR Part 93.126 and 6 NYCRR Part 240.27.

#### **A. Safety**

- A1 Railroad/highway crossing
- A2 Projects that correct, improve, or eliminate a hazardous location or feature
- A3 Safer non-Federal-aid system roads
- A4 Shoulder improvements
- A5 Increasing sight distance
- A6 Highway Safety Improvement Program implementation
- A7 Traffic control devices and operating assistance other than signalization projects  
*(including ITS maintenance and ITS operations for incident management / safety warnings)*
- A8 Railroad/highway crossing warning devices
- A9 Guiderrails, median barriers, crash cushions
- A10 Pavement resurfacing and/or rehabilitation
- A11 Pavement marking
- A12 Emergency relief (23 U.S.C. 125)
- A13 Fencing
- A14 Skid treatments
- A15 Safety roadside rest areas
- A16 Adding medians
- A17 Truck climbing lanes outside the urbanized area
- A18 Lighting improvements
- A19 Widening narrow pavements or reconstructing bridges (no additional travel lanes)
- A20 Emergency truck pullovers

#### **B. Mass Transit**

- B1 Operating assistance to transit agencies *(or entities that provide transit service)*
- B2 Purchase of support vehicles
- B3 Rehabilitation of transit vehicles<sup>i</sup>
- B4 Purchase of office, shop, and operating equipment for existing facilities
- B5 Purchase of operating equipment for vehicles (ie: radios, fareboxes, lifts, etc.)
- B6 Construction or renovation of power, signal, and communications systems *(including new systems to inform passengers of transit line schedule + status)*
- B7 Construction of small passenger shelters and information kiosks
- B8 Reconstruction or renovation of transit buildings and structures (ie: rail or bus buildings, storage and maintenance facilities, stations, terminals, and ancillary structures)
- B9 Rehabilitation or reconstruction of track structures, track, and trackbed in existing rights-of-way
- B10 Purchase of new buses and rail cars to replace existing vehicles or for minor expansions (< 10%) of the fleet.<sup>i</sup> *(NOTE: NYS ICG recommends case-by-case consultation for all expansions, also see footnote "i" on next page)*
- B11 Construction of new bus or rail storage/maintenance facilities categorically excluded in 23 CFR Part 771

**EXEMPT PROJECTS, cont.****C. Air Quality and Other**

- C1 Continuation of ride-sharing and van-pooling promotion activities at current levels
- C2 Bicycle and pedestrian facilities
- C3 Planning and technical studies
- C4 Grants for training and research programs
- C5 Planning activities conducted pursuant to titles 23 and 49 U.S.C.
- C6 Federal-aid systems revisions
- C7 Engineering to assess social, economic, and environmental effects of the proposed action or alternatives to that action
- C8 Noise attenuation
- C9 Emergency or hardship advance land acquisitions (23 CFR 710.503)
- C10 Acquisition of scenic easements
- C11 Plantings, landscaping, etc.
- C12 Sign removal
- C13 Directional and informational signs (*including ITS maintenance and ITS operations projects*)
- C14 Transportation enhancement activities (except rehabilitation and operation of historic transportation buildings, structures, or facilities)
- C15 Repair of damage caused by natural disasters, civil unrest, or terrorist acts, except projects involving substantial functional, locational or capacity changes

**Projects Exempt from Regional Emissions Analysis**

40 CFR Part 93.127 includes “Table 3 - Projects Exempt from Regional Emissions Analysis,” which is also presented in 6 NYCRR Part 240.28. Such projects are exempt from regional emissions analysis requirements, but require consideration of the local effects with respect to CO or PM<sub>10</sub> and PM<sub>2.5</sub> concentrations to determine if a hot-spot analysis is required prior to making a project-level conformity determination. These projects may then proceed to the project development process, even in the absence of a conforming plan and TIP.

**D. “Hot-Spot” Project-Level Conformity Analysis**

- D1 Intersection channelization projects
- D2 Intersection signalization projects at individual intersections
- D3 Interchange reconfiguration projects
- D4 Changes in vertical and horizontal alignment
- D5 Truck size and weight inspection stations
- D6 Bus terminals and transfer points

---

<sup>i</sup> In PM<sub>10</sub> and PM<sub>2.5</sub> nonattainment or maintenance areas, such projects are exempt only if they are in compliance with control measures in the applicable implementation plan.

**Other miscellaneous codes:**

- J1 *Block of Funds, no projects OR likely non-exempt but no preferred/likely alternative*
- K1 *Exempt / not regionally significant through interagency consultation and does not have a code in the list above.*
- K2: *Project is subject to general conformity and is not subject to the regional emissions analysis requirements under transportation conformity*

## Attachment 9

**Schoharie County Capital Program of Transportation Projects**  
**NYS DOT Region 9**

FFY Let	Region	PIN	Air Quality Code	New or Carryover	Project Title	Current Letting	Letting Organization	Project Description	FEDERAL	LOCAL	STATE
2028	09	908502	A2	New	RT 146 OVER KINGS CREEK, INVERT PAVING, TOWN OF WRIGHT, SCHOHARIE COUNTY	10/28/2027	NYS DOT	This project paves the inverts of three corrugated steel pipes on BIN 1079800, Rt. 146 over Kings Creek in the town of Wright, Schoharie County.	\$ 480,000		\$ 120,000
2025	09	935852	A10	New	188 RESURFACING AND JOINT REPAIRS, OTSEGO COUNTY LINE TO EXIT 20, SCHOHARIE COUNTY	3/27/2025	NYS DOT	This project resurfaces and repairs failed transverse joints and potholes along 188 from the Otsego County line to just east of Exit 20 in the town and village of Richmondville, Schoharie County (MP 0.00 to 5.49). Additional work includes the installation of new guide railing, MIARDs and pavement markings.	\$ 14,940,000		\$ 1,660,000
2026	09	975555	A19	New	LOWE ROAD OVER WEST CREEK BRIDGE REPLACEMENT, TOWN OF SEWARD, SCHOHARIE COUNTY, BNY 2022	10/20/2025	LOCAL	This project replaces the bridge that carries Lowe Road over West Creek (BIN 2228670) in the Town of Seward, Schoharie County, to maintain long-term integrity of the crossing using cost-effective techniques to minimize the life cycle cost of maintenance and repair. This project also addresses geometric deficiencies, improves the hydraulic capacity and improves traffic flow. Project Awarded through Bridge New York 2022. Total Award = \$3,153,565. Project does not alter capacity/no additional travel lanes.	\$ 2,327,064	\$ 122,477	
2026	09	975556	A19	New	MICKLE HOLLOW RD OVER TRIB COBLESKILL CREEK CULVERT REPLACEMENT, TOWN OF COBLESKILL, SCHOHARIE COUN	2/23/2026	LOCAL	The project preserves a section of Mickle Hollow Road with a complete culvert replacement. The proposed culvert will have a longer span to increase the hydraulic opening. The barrel length will be lengthened to accommodate wider lanes and shoulders. Concrete flared wingwalls on both the upstream and downstream ends will be constructed along with stone fill installed to help prevent scouring of the banks. Guiderail will be installed over the proposed crossing and the approaches to make the roadway safer for vehicles. Town of Cobleskill, Schoharie County			\$ 1,013,000
2026	09	975557	A19	New	HEATHEN CREEK RD OVER HOUSE CREEK CULVERT REPLACEMENT, TOWN OF FULTON, SCHOHARIE COUNTY, BNY 2022	2/13/2026	LOCAL	The project preserves this section of Heathen Creek Road by replacing the culvert that carries Heathen Creek Road over House Creek (MP 0.00 to 0.025). The new structure consists of a precast concrete three-sided unit with a span of approximately 18 feet founded on cast in place concrete footings on rock, plus in-line wingwalls on both ends and new bridge rail/guide rail. To provide for better intersection alignment, the new structure will be constructed adjacent to the existing structure. During construction, the existing structure will be reduced to a single lane and temporary signals installed to control intersection traffic. Town of Fulton, Schoharie County.			\$ 1,025,000
2026	09	975592	A19	New	CR 64/MEADE RD OVER CHARLOTTE CK, BRIDGE REPLACEMENT, TOWN OF SUMMIT, SCHOHARIE COUNTY, BNY 2023	6/22/2026	LOCAL	This project replaces the deteriorated structure that carries CR 64 / Meade Rd. over Charlotte Ck (BIN 3355130) on a slightly improved alignment with minor approach work in the town of Summit, Schoharie County. Bridge NY 2023 Award = \$3,402,000.00. Project does not alter capacity/no additional travel lanes.	\$ 2,439,650	\$ 128,402	
2026	09	975593	A19	New	CR 4/W FULTON RD CULVERT REPLACEMENT, TOWN OF RICHMONDVILLE, SCHOHARIE COUNTY, BNY 2023	4/15/2026	LOCAL	This project rehabilitates or replaces the culvert along CR 4 / W. Fulton Rd. in the town of Richmondville, Schoharie County in order to improve the hydraulic condition of the stream crossing. Bridge NY 2023 Award = \$1,480,000.00.			\$ 1,111,800
2027	09	980723	A10	New	RTE 990V DEP BETTERMENT PAVEMENT REHABILITATION PROJECT	12/24/2026	NYS DOT	This preventive maintenance project repairs culverts and restores 6.00 lane miles of Rt. 990V (MP 0.00 to 2.9) in the towns of Gilboa and Conesville in Schoharie County.		\$ 3,000,000	
2025	09	980764	A19	New	JOC - BRIDGE MAINTENANCE, OTSEGO AND SCHOHARIE COUNTIES, 2025-2026	1/23/2025	NYS DOT	This project is utilized to repair bridges, including but not limited to bearings, joints, pedestals, decks, wearing surfaces and approach slabs in the counties of Otsego and Schoharie.			\$ 823,498
2026	09	980771	A2	New	JOC - HIGHWAY/DRAINAGE COMBINED, DELAWARE AND SCHOHARIE COUNTIES - 2026-2027	2/5/2026	NYS DOT	This Job Order Contract (JOC) for Highway and Drainage work is a preventive maintenance project to repair roadway elements including but not limited to pavement, guiderail, culverts, closed & open drainage systems and hazardous tree removals within the counties of Delaware and Schoharie Counties.			\$ 857,000
2026	09	980774	A19	New	BRIDGE RAIL REPLACEMENT, REGIONWIDE, SFY 2025	12/18/2025	NYS DOT	This project replaces deteriorated bridge railing tubes and transition rail on various bridges within Region 9. Any tuning fork transitions and wrap around clamps are also replaced.	\$ 2,400,000		\$ 600,000
2025	09	9CR551	A10	New	2025 CRACK SEALING, REGIONWIDE	2/18/2025	NYS DOT	This contract cleans and seals cracks on various state routes and interstates in the counties of Broome, Chenango, Delaware, Otsego, Schoharie, Sullivan, and Tioga.	\$ 720,000		\$ 180,000
2026	09	9CWS01	C13	New	CURVE WARNING SIGN UPGRADES, REGION 9	4/9/2026	NYS DOT	This project addresses Curve Warning Signs to bring them up to current standards throughout Region 9. Federal share 100% with 10% Toll credits. Statewide HSIP - The office of Safety and Mobility has confirmed the use of Main Office HSIP funds on curve warning sign projects. Project will meet the 2009 MUTCD Signing requirements.	\$ 6,300,000		
2025	09	9LC101	A19	New	LARGE CULVERT REHABILITATION PROJECT, BROOME AND OTSEGO COUNTIES	6/26/2025	NYS DOT	This project rehabilitates 12 large culverts. C910011, C910012, C910013 in Town of Kirkwood, Broome County; C910017 in Town of Chenango, Broome County; C910019, C910020 in the Town of Barker, Broome County; C910028, C910029 in the Town of Lisle, Broome County; C910118 in Town of Vestal, Broome County; C910197, CA00141 in Town of Colesville, Broome County, and C950168 in the Town of Oneonta, Otsego County.	\$ 5,388,900		\$ 2,931,100
2026	09	9LC113	A19	New	LARGE CULVERT REPLACEMENT PROJECT, BROOME, CHENANGO, DELAWARE, OTSEGO, SCHOHARIE, SULLIVAN AND TIOGA	6/4/2026	NYS DOT	This project will replace large culverts structures in Broome, Chenango, Delaware, Otsego, Schoharie, Sullivan and Tioga Counties,	\$ 9,208,000		\$ 2,302,000
2025	09	9M1025	A19	New	BRIDGE WASHING PROJECT REGIONWIDE FFY25	12/19/2024	NYS DOT	Cyclical maintennce project to wash bridges across the region. 488 bridges are washed over two years. Some of the weathering steel bridges may need to be washed twice during the two-year period, to be determined during the Preliminary Design phase. Various federal aid locations, Region 9	\$ 1,606,876		\$ 401,719
